Master of Science Programs

The MS programs provide academically distinguished and industry-oriented students the opportunity to obtain rigorous, graduate level training comprised of PhD and MBA courses at Columbia Business School.

Concentrating on areas within Finance and Quantitative Marketing, these programs train students in analytics, modeling and forecasting, sophisticated programming tools and machine learning. Students pursue entry-level or pre-manager roles depending on their experience prior to joining the programs.

Financial Economics

The Master of Science in Financial Economics is a two-year STEM-eligible program that provides students with the quantitative and theoretical tools for a successful career in finance. Potential employers include investment and commercial banks, asset management companies, economic consulting firms, and policy-oriented organizations.

**Schedule**

Two-year program, with a summer internship

Students begin their academic program in September and graduate in May, two years after matriculation, and participate in a summer internship between their first and second years in the program.
